

COACH TRAILER DRAWINGS

These trailer drawings are merely a sample of what T&E has done for our current and past customers. All T&E Trailers are totally customizable - feel free to contact us with your specific ideas and we can generate a drawing set unique to your needs.

The Coach trailer presented in these drawings features a T&E Aluminum Lift and a simple overhead cabinet across the front wall. Gemini Steel Lifts are also available. There is an attic area in the front portion of the trailer with a winch mounted there to facilitate raising and lowering the special side main entry door to load a golf cart, cycles or other cargo in the front area of the trailer. This special main entry door also opens in the traditional fashion as a swinging door in addition to operating like a loading ramp door. There is also a 48" side door to provide for access and exit from a vehicle parked inside. On the front of the trailer a compartment is located on the tongue bracing which holds batteries and related items as well as to provide limited storage.

Custom aluminum benches, top cabinets and a host of other optional trailer equipment are available to meet your unique requirements. T&E can also provide custom paint services so that your trailer paint matches the paint scheme on your motor home.
